

**University of Glasgow
College of Medical, Veterinary and Life Sciences
Research Institute of Health & Wellbeing**

Research Assistant/Associate

Vacancy Ref: 017995

Salary: Grade 6, £27,629 - £31,076 / Grade 7, £34,520 - £38,833 per annum

You will make a leading contribution to the project: Treatment effectiveness in multimorbidity:

Combining efficacy estimates from clinical trials with the natural history obtained from large routine healthcare databases to determine net overall treatment benefits.

The purpose of this post is to conduct, present and publish quantitative research in the fields of epidemiology, clinical trials, and evidence based medicine.

Specifically, the successful candidate will participate in research developing novel methods for determining treatment effectiveness in “real-world” populations using a combination of routine healthcare data and clinical trial data. The candidate will have excellent organisational skills, and expertise in working with data including data cleaning, documentation and statistical modelling.

This project has been funded by the Wellcome Trust and will be supervised from within the Institute of Health and Wellbeing in the College of Medical, Veterinary and Life Sciences

The funding for this post is for 30 months in the first instance.
